September 2017
Report Prepared By: Daniel L. Fulks, Ph.D., CPA, Professor Emeritus, University of Kentucky

NCAA is a trademark of the National Collegiate Athletic Association.

## PREFACE AND ACKNOWLEDGMENTS

This report represents the 2017 edition of Revenues and Expenses of NCAA Division I Intercollegiate Athletics Programs. Although editions before 1989 were conducted, independently of the NCAA, by Professor Mitch Raiborn of Bradley University, editions subsequent to that date have been joint efforts of the NCAA research staff and me. This edition includes data for the fiscal years 2004 through 2016.

Both the format and content of the study continue to evolve. The 2016 reporting consists of eight separate segments - one for each of the three Division I subdivisions and one for all Division I men's and women's basketball. Important additions with this edition are separate groupings for the Autonomy schools and the Non-Autonomy schools. Separate reports for Divisions II and III will be issued later this year. The feedback we have received from readers of previous editions indicates that the operating environment and financial aspects in each division and subdivision are sufficiently different to warrant separate reports. Starting in 2008, the format for the report is significantly different from that of previous editions, and the reader is encouraged to read the introduction for explanation of these changes. Most data reported for fiscal years before 2004 are not comparable to those of subsequent years.

We believe this report provides valuable insight into the financial state of affairs in intercollegiate athletics and the changing environment in which college and university athletics programs operate. As always, reader comments, inquiries, and/or suggestions are welcome and appreciated.

It also is relevant to note that in spring 2004, the National Association of College and University Business Officers (NACUBO)/NCAA Task Force completed a year- long project aimed at improving the consistency of reporting and the quality of financial data related to intercollegiate athletes. This project resulted in numerous changes to our survey instrument, which were implemented with the fall 2004 data collection and are reflected in reports subsequent to that date.

I express my sincere appreciation to Kathleen McNeely, chief financial officer, and Todd Petr, managing director of research, for the NCAA, for providing me the opportunity to conduct this study and the freedom to carry it out as I saw fit. Their enthusiastic support is not only sincerely appreciated but also is vital to the continuation of this project. Very special thanks go to Nicole Hollomon, associate director of research, and to Erin Irick, assistant director of research, for their many hours of data compilation, programming and analysis. Thanks also to my fellow consultant and colleague Maria DeJulio of the NCAA research department.

We also thank the representatives of the NCAA member institutions who responded to the survey at a time when demands upon athletics administrators for information are sometimes overwhelming. Confidentiality was assured and will be honored.

We hope readers will find the report interesting and useful. Please direct comments or questions to me at the address below:

# REVENUES AND EXPENSES OF NCAA DIVISION I INTERCOLLEGIATE ATHLETICS PROGRAMS REPORT <br> Fiscal Years 2004 through 2016 

## BACKGROUND AND CHANGES

The 2008 edition of Revenues and Expenses of Intercollegiate Athletics Programs reflected significant changes in the collection, classification and reporting of data related to the financial aspects of intercollegiate athletics. The changes were in response to heightened interest in the financial area from the media, the public and NCAA leadership and were designed to render the reported information more relevant, meaningful and useful. The primary objective then and now is to isolate the financial impact of athletics on the respective educational institutions. The 2017 edition continues that effort.

The current edition has been shortened from prior editions with many tables no longer presented. Readers from NCAA member institutions are encouraged to access the Institutional Performance Program (IPP) in order to see more detailed financial information.

Revenue Definitions. Revenues appearing on the athletics budget are grouped as either: (1) Allocated revenues; or (2) Generated revenues. Allocated revenues are comprised of:

- Student fees directly allocated to athletics;
- Financial transfers directly from the general fund to athletics (i.e., direct institutional support);
- Indirect institutional support, such as the payment of utilities, maintenance, support salaries, etc., by the institution on behalf of athletics; and
- Direct governmental support, which is the receipt of funds from state and local governmental agencies that are designated for athletics.

Generated revenues are produced by the athletics department and include ticket sales, radio and television receipts, alumni contributions, guarantees, royalties, NCAA distributions, and other revenue sources that are not dependent upon institutional entities outside the athletics department.

Expense Definitions. Similarly, some expense items have been grouped as either: (a) Those paid by the athletics department; or (b) Those paid by outside parties. Unless guaranteed in amount by the institution, these thirdparty payments should not be included in determining the net financial results of the athletics operations. In addition, indirect support from the institution, such as facilities maintenance, insurance, utilities, etc., has been isolated and reported as a line item on both the revenue and the expense side. Since indirect support is excluded from generated revenues, the resulting expense item is included in the net cost to the institution.

Net Results. New terminology for the net operating results of the athletics department also was introduced in the 2008 report. "Net generated revenue" results when total generated revenues exceed university-paid (or guaranteed) expenses. A "negative net generated revenue" results when university-paid (or guaranteed) expenses exceed generated revenues. These are generally recognized terms in the economics literature.

Reporting of Median Values. Also, significant in the 2008 report was the change from reporting average (or mean) data to median data. The impetus for this change was the impact that unusually large (outlier) revenue items, primarily alumni and booster contributions, have had on average amounts in recent years. Moreover, for most comparative purposes, median statistics are more meaningful than are averages. Mean data are still reported in the percentile tables, and the distribution tables.

The caveat is that median data also can be misleading. First, unlike average data, medians are not additive. Thus, tables including "total" values may be confusing. Second, there are many instances in the tables where subdivision median values are zero. This results when at least one-half of the responding institutions report zero or below zero values for a given line item. In such cases, the resulting median, the midpoint value, will be zero.

Historical Comparability. Because of the substantial changes in data collection and reporting, comparisons with years before 2004 are no longer meaningful. Thus, the 2004 fiscal year is a benchmark year. This 2017 edition provides summary information concerning revenues and expenses of NCAA Division I and its three subdivisions for the 2004 through 2016 fiscal year (i.e., institutions' fiscal years that ended within those respective calendar years). In addition, since this edition is the first to report data for the two FBS segments, comparisons are not possible for prior years for those groupings. The data were collected via a survey conducted in connection with data collection mandated by the federal Equity in Athletics Disclosure Act (EADA), the results of which are close to 100 percent usable response rates.

The 2004 fiscal year was also the first year in which audited data were utilized, as well as the initial year for data to be submitted electronically by the respective institutions. Better quality data and more useful reporting result from these changes.

It is important to note that a few changes were made to definitions in the data collection instrument which may result in some slight changes in the way data were reported. On the revenue side these included:

- Adding a category that accounts for monetary transfers from the athletics department back to the university;
- Making in-kind contributions separate from cash contributions (for purposes of consistency those categories remain combined in this report); and
- Making media rights its own category. In the past media rights had been included with NCAA and conference distributions.

Similar studies were conducted for the NCAA under the previous format since 1969, with resulting reports published under the same title periodically from 1970 through 2004. The corresponding reports have been published and are available on the NCAA website. Surveys before 1993 were conducted independently of the NCAA, by Dr. Mitchell Raiborn of Bradley University, and the data collected are not in the possession of, nor under the control, of the NCAA.

## OBJECTIVES AND METHODS

Please see Appendix A for Objectives and Methods of the report.

## ORGANIZATION OF THE REPORT

The financial information in this report is classified and presented in detail by subdivision, with men's and women's basketball information also provided for the entire division. The reported numbers consist almost entirely of medians and frequency distributions of means for the respective subdivisions. Partial financial data for the fiscal years 2004 through 2014 also are provided for comparative purposes. Prior years' data, although not comparative, may be found in earlier editions of the report by the same title.

There are eight sections of the report:
Section I - Introduction and Survey Methodology. This section provides a background for the study and its stated objectives. A description of the survey instrument is given, as well as an analysis of the number and relative proportion of respondents from the respective subdivisions.

Section II - Summary Information. Summary tables are presented in this section showing median total revenue and expense data for each subdivision, as well as net generated revenues (surpluses and deficits). Tables also show average number of sports offered, average number of student-athletes, and average expense per student-athlete. These tables make it possible to see overall results and to make comparisons across subdivisions.

Sections III through VII - Subdivision Information. Each of the three subdivisions is reported separately in these sections. Medians are shown for generated revenues, total revenues, total expenses, revenues and expenses by sport, revenues and expenses by gender, and net operating results. Frequency distributions are provided for each set of means. Additional data are reported for salaries and benefits.

Section VIII - Division I Combined Basketball. This section presents a summary of basketball operations for all Division I institutions.

Appendix A - Objectives and Methods.
Appendix B-Glossary. The appendix provides definitions of terms as they are used in the survey and the report.

## SUGGESTIONS FOR THE READER

Several basic considerations should be weighed when using the information in this report:

1. In 2016, the NCAA made the Institutional Performance Program (IPP) available to the membership in all three divisions. This powerful tool allows users access to a great array of financial data and also allows direct comparisons to groups of peer institutions. Because this is now available, this report focuses on higher-level analyses and overall financial trends. All member institutions are encouraged to use this report along with the IPP to best understand their own athletics financial situation.
2. An individual institution's actual results may differ greatly from that institution's divisional median or average; no two institutions operate in identical environments or under identical circumstances. The varying sizes of institutions and their budgets, as well as the markets within which the institutions operate, may have dramatic effects on financial results. In addition, there are inherent differences in fiscal demands and resources of public institutions and those of private institutions.
3. There are significant differences across the various subdivisions. For instance, athletics programs offering football operate in a different environment from those that do not, and the impact of the differences noted above within a subdivision are likely to be even greater when making comparisons across different subdivisions. Also noteworthy is the fact that the proportion of private versus public institutions varies by subdivision.
4. Revenues and expenses that are not specifically related to men's or women's programs have been classified as nongender or, in some cases, administrative. Examples of such expenses would be those related to academic support centers or training facilities utilized by all student-athletes. Although it may be possible for many member institutions to allocate such revenues and expenses among male and female student-athletes, the inconsistencies among allocation methods of the institutions and lack of precision would result in misleading data. Until these inconsistencies and imprecisions are remedied, such items will be reported separately.

Throughout the report, it is hoped that the information presented in a table is clear and self-explanatory. Brief explanations of tables are provided as deemed necessary. Please refer to the Glossary in the Appendix for definitions of terms as they are used in this report. The report is available online (www.NCAA.org). Additionally, a brief video presentation regarding finances of intercollegiate athletics is available at the NCAA website.)

## SELECTED FINDINGS AND OBSERVATIONS

Following are selected findings and observations, presented by the total division, as well as sub-divisional groupings, with comparisons to the 2004 through 2015 fiscal years. Because of the significant changes in data collection and reporting, trends included in reports prior to 2004 are not included. Related table numbers are indicated in parenthesis.

## FOOTBALL BOWL SUBDIVISION

Generated Revenues. Median generated revenues for the Autonomy Group (AG) is $\$ 94,900,000$, an increase of 11 percent over 2015; for the NonAutonomy Group (NA) the median is $\$ 13,200,000$, an increase of five percent over 2015; for the total subdivision (FBS) the median is $\$ 52,800,000$, an increase of 10 percent. (2.1)

Total Operating Expenses. Median total expenses for the AG is $\$ 99,000,000$, an increase of seven percent over 2015; for NA is $\$ 33,000,000$, an increase of four percent; All FBS is $\$ 72,000,000$, an increase of eight percent. (2.1)

Number of Student-Athletes. No significant change in the number of studentathletes in either reporting group. (2.1)

Net Generated Revenues. The median negative net generated revenue for the $A G$ is $\$ 3,600,000$ (i.e., the median loss for a program in the $A G$ ), which must be supplemented by the institution; for the NA is $\$ 19,900,000$; and for all FBS is $\$ 14,400,000$. (2.2)

Percent of Institutional Spending. In terms of the total institutional budget, athletics expenditures represent approximately six percent of the total budget at the median. It should be noted that this percentage does not take into account the revenues generated by athletics. (2.3)

Expense per Student-Athlete. The median expense per student-athlete in the AG is $\$ 79,000$ per female and $\$ 181,000$ per male; $\$ 44,000$ per female and $\$ 77,000$ per male in the NA; $\$ 63,000$ and $\$ 132,000$ in the FBS total. (2.3)

Financial Haves and Have-nots. A total of 24 programs in the AG showed positive net generated revenues (profits), with a median of $\$ 10,000,000$, while the remaining 41 of the AG lost a median of $\$ 10,000,000$; the 64 NA programs lost a median of $\$ 20,000,000$; the total FBS loss is a median of $\$ 18,000,000$. Net losses for women's programs were $\$ 14,000,000$ for AG, $\$ 6,500,000$ for NA, and $\$ 9,000,000$ for FBS. (3.5, 4.5, 5.5)

Generated Revenue Sources. When looking at sources of revenue, the following patterns emerged in terms of the percentage of generated revenues from various sources:

AG: Ticket sales = 23\%; Donor contributions = 23\%; Broadcast rights = $21 \%$; Conference/NCAA distributions $=12 \%$. (4.7)

NA: Donor contributions = 24\%; Ticket sales = 19\%; Conference/NCAA = $18 \%$; Royalties/sponsorships $=12 \%$. $(5.7)$

All FBS: Donor contributions $=23 \%$; Ticket sales $=22 \%$; Broadcast rights $=$ $19 \%$; Conference/NCAA = 13\%. (3.7)

Expense Distributions. When looking at expense items, the following patterns emerged in terms of the percentage of total expense to various categories:

AG: Compensation $=35 \%$; Facility maintenance/rental $=18 \%$; Grants-in-aid $=13 \%$. (4.8)

NA: Compensation $=33 \%$; Grants-in-aid $=20 \%$; Facility maintenance/rental $=11 \%$. 5.8 )

All FBS: Compensation = 4\%; Facility maintenance/rental = 16\%; Grants-inaid $=15 \%$. (3.8)

## FOOTBALL CHAMPIONSHIP SUBDIVISION

Number of Student-Athletes. There was no significant change (.5\%) in the number of student-athletes. (2.1)

Expense per Student-Athlete. Expense per student-athlete increased from $\$ 40,000$ to $\$ 43,000$. (2.3)

Generated Revenue. The median generated revenues increased by nine percent (after adjusting for inflation) from $\$ 4,047,000$ to $\$ 4,492,000$. (6.1)

Total Operating Expenses. Total operating expenses grew by five percent (after inflation) from $\$ 16,174,000$ to $\$ 17,290,000$. (6.1)

Net Generated Revenues. The result is a median net loss for the subdivision of $\$ 12,550,000$; men's programs $=\$ 5,022,000$ and women's programs $=$ $\$ 4,089,000$. These medians are up only slightly from 2015. (6.1)

Percent of Institutional Spending. In terms of the total institutional budget, athletics expenditures represent approximately eight percent of the total budget, up from 7.4 percent in 2015. It should be noted that this percentage does not take into account the revenues generated by athletics. (6.3)

Revenue Sources. When looking at sources of revenue, the following patterns emerged in terms of the percentage of generated revenues from various sources:

Contributions from alumni and others $=30 \%$; NCAA and conference distributions $=16 \%$; Ticket sales $=14 \%$. (6.7)

Expense Distribution. When looking at expense items, the following patterns emerged in terms of the percentage of total expenses to various categories:

Salaries and benefits $=31 \%$; Grants-in-aid $=26 \%$. These two expense items account for 57 percent of total expenses. (6.8)

Coaches' Salaries: Highest coaches' salaries for men's programs were football and basketball; and women's programs were basketball and ice hockey. ( 6.10 and 6.11)

Losses per Sport: Highest losses incurred were in gymnastics and basketball for women's programs and football and basketball for the men. (6.9)

## DIVISION I WITHOUT FOOTBALL

Median Losses. The median net loss for the 95 schools in this subdivision was $\$ 12,595,000$ for the 2016 reporting year, compared with $\$ 11,764,000$ in 2015, and $\$ 5,367,000$ in the 2004 base year. (7.1)

Change from 2015. After removing the effect of inflation, generated revenues decreased by 4.27 percent and total expenses increased by 3.98 percent. (7.3)

Programmatic Results. Five men's basketball programs reported positive net generated revenues, with a median of $\$ 1,742,000$, while the remaining 90 schools reported a median negative net generated revenue of $\$ 1,573,000$. The median loss for women's basketball was $\$ 1,415,000$. These losses are up slightly from 2015 and more than double from 2004. (7.6)

Most Expensive Sports. For the women's programs, ice hockey followed by equestrian were the most expensive sports. For the men, volleyball followed by baseball. (7.9)

Compensation. Highest compensation, for both head coaches and total coaches, were found in men's basketball and ice hockey, with the same on the women's side. (7.10)

Revenue Sources. When looking at sources of revenue, the following patterns emerged in terms of the percentage of generated revenues from various sources:

Alumni and donor contributions $=29 \%$; Ticket sales $=18 \%$; NCAA and conference distributions $=18 \%$. (7.12)

Expense Distribution. When looking at expense items, the following patterns emerged in terms of the percentage of total expenses to various categories:

Salaries and benefits $=32 \%$; and Grants-in-aid $=29 \%$. (7.13)

## SUMMARY INFORMATION

| Women |  |
| Administrative and Non-gender |  |

Note: These percentages are based on mean values, rather than medians.

## Appendix A - Objectives and Methods

Objectives. The primary objective of the 2017 edition of this report is to update the information in previous reports. Current data are presented concerning sources of revenues (ticket sales, television, etc.) and objects of expenditures (grants-in-aid, coaches' salaries, etc.). Revenue and expense data are categorized by program (men's and women's) and by the specific sports of football and basketball. Limited information is also presented for other NCAA-sanctioned sports.

An additional objective is to provide a basis for analysis of the revenue and expense trends of athletics programs within each of the respective Division I subdivisions. Thus, all data for a particular subdivision are shown in a self-contained section in the report, although some summary data for all Division I member institutions are provided in a summary section at the beginning of the report. This is also the first report that contains data separated by the two categories of FBS institutions (i.e., Autonomy and Non-Autonomy).

Additionally, Section VIII of the report provides aggregated data for all Division I basketball programs.

A final objective of the report is to provide data relevant to gender issues Tables throughout the report provide comparisons of revenues and expenses of men's and women's programs within each subdivision Additional information regarding gender issues may be found in other NCAA publications.

Methods. All NCAA Division I member institutions, including provisional members, provide data annually via the NCAA Financial Reporting System In all cases, respondents are clearly instructed to limit their responses to intercollegiate athletics only, excluding intramural and club sports. Collection instructions also request that data be separated by gender, which enables data for men's and women's programs to be presented separately.

The financial data requested included: Total revenues and expenses by program (men's and women's); Total revenues and expenses by sport; Total revenues by source (e.g., ticket sales, student fees and television receipts); Total expenses by expense object (e.g., grants-in-aid, salaries and travel); and categorized salary information. Organizational data, such as the number of participating athletes, the number of sports offered, the cost of grants-inaid and other similar information, also are requested. Some of those data are presented in this report, while others may be found in other NCAA publications. (www.NCAA.org)

Since response rates for all three subdivisions were 100 percent, readers are able to compare financial results for one member institution with the median and mean results for other members in the same subdivision. Readers may determine how their institutions' athletics programs are faring, relative to other similar institutions. They also may see how their institutions' financial trends in recent years compare with the trends for similar institutions. Some comparisons also may be drawn among the results in the various subdivisions. These comparisons are presented in tabular form in the summary section of the report.

NOTE: Because confidentiality was assured to respondents, neither the NCAA nor the author is able to provide data from individual institutions. To obtain such financial information, readers are directed to the U.S. Department of Education website to obtain EADA information for specific institutions. Readers should be cautioned that the Department of Education EADA reports do not eliminate allocated revenues from the data. The result is that many, if not most, institutions report break-even results, since institutional support covers any resulting deficit.

## Appendix B-Glossary

## Revenue Items from Agreed-Upon Procedures

Broadcast Television,
Radio and Internet
Rights
Compensation and
Benefits Provided by a Third Party

Contributions

Direct Institutional
Support

Direct State or Other Government Support

Endowment and
Investment Income

Guarantees

Indirect Facilities and Administrative Support

NCAA/Conference
Distributions

Nongender Revenues and
Expenses
Other

Institutional revenue received directly for radio and television broadcasts, Internet and e-commerce rights received through institution-negotiated contracts.

All amounts provided by a third party and contractually guaranteed by the institution but not included on the institution's W-2.

Amounts received directly from individuals, corporations, associations, foundations, clubs or other organizations that are designated, restricted or unrestricted by the donor for the operation of the athletics program. Amounts paid in excess of a ticket's value are included. Contributions include cash, marketable securities and in-kind services or property. Gifts and merchandise from corporate sponsorship agreements are not included here.

The value of institutional resources for the current operations of intercollegiate athletics, and all unrestricted funds allocated to the athletics department by the university. Federal Work Study support for student workers employed by athletics also is included.

State, municipal, federal and other government appropriations made in support of the operations of intercollegiate athletics. This includes funding specifically earmarked to athletics by government agencies for which the institution has no discretion to reallocate.

Endowment spending policy distributions and other investment income in support of athletics. These categories include only restricted investment and endowment income for the operations of intercollegiate athletics.

Revenue received from participation in away games.

The value of facilities and services provided by the institution not charged to athletics. This may include an allocation for institutional administrative cost, facilities and maintenance, grounds and field maintenance, security, risk management, utilities, depreciation, and debt service. This is offset by an equal expense item.

Revenue received from participation in bowl games and tournaments and all NCAA distributions. Amounts received for direct participation or through a sharing arrangement with an athletics conference, including shares of conference television agreements, are included. These amounts are reported by sport, if known.

Revenues and expenses that are not specifically related to men's or women's programs are grouped as either nongender or administrative. Please see Suggestions for the Reader in the Introduction.

Limited to less than five percent of total revenues may appear in this category. Any excess is to be reclassified to other categories.

Program Sales,
Concessions, Novelty
Sales and Parking
Royalties, Licensing,
Advertisements, and
Sponsorships
Sports-Camp Revenues

Student Fees

Ticket Sales

Revenue derived from game programs, novelties, food or other concessions, and parking. This does not include sales of game program advertising.

All revenue from corporate sponsorships, licensing, sales of advertisements, trademarks and royalties. In-kind products and services are included.

Amounts received by athletics for sports camps and clinics.

Student fees assessed by the institution and restricted for support of intercollegiate athletics.

Revenue received for sales of admissions to athletics events. Included are ticket sales to the public, faculty and students, and money received for shipping and handling of tickets. Not included are ticket sales for conference and national tournaments that are pass-through transactions.

## Expense Items from Agreed-Upon Procedures

Athletic Student Aid

Coaching Other
Compensation and
Benefits Paid by a Third
Party
Coaching Salaries,
Benefits and Bonuses Paid
by the University
Direct Facilities,
Maintenance, and Rental
Equipment, Uniforms and Supplies

Fundraising, Marketing and Promotion

Game Expenses

The total amount of athletically related student aid awarded, including summer school and tuition discounts and waivers (including aid given to student-athletes who have exhausted their eligibility or who are inactive due to medical reasons).

All compensation paid to the coaching staff by a third party and contractually guaranteed by the institution but not included on the institution's W-2. Examples include shoe and apparel contract revenue, housing allowances, compensation from camps, and television and radio income.

Gross salaries, bonuses and benefits provided to head and assistant coaches, which includes all amounts attributable to coaching that would be reportable on the university or related entity W-2 and/or 1099 forms. Examples include car stipend, club membership, entertainment allowance, clothing allowance, television income and tuition remission.

Direct facilities costs charged to intercollegiate athletics, including building and grounds maintenance, utilities, rental fees, operating leases, equipment repair and maintenance, and debt service.

Includes only items that are provided to teams. Equipment amounts are those expended from current or operating funds.

Costs associated with fundraising, marketing and promotion for media guides, brochures, recruiting publications and other such expenditures.

Game-day expenses other than travel that are necessary for intercollegiate athletics competition, including officials, security, event staff, ambulance and other such expenditures.

## Guarantees

Indirect Facilities and Administrative Support

Medical Expenses and
Medical Insurance

Memberships and Dues

Other Operating Expenses

Recruiting

Severance Payments

Spirit Groups

Sports-Camp Expenses

Support Staff/
Administrative Salaries,
Benefits and Bonuses
Paid by a Third Party
Support Staff/
Administrative Salaries,
Benefits and Bonuses Paid
by the University and
Related Entities
Team Travel

Amounts paid to visiting participating institutions.

The value of facilities and services provided by the institution and not charged to athletics. This support may include an allocation for institutional administrative cost, facilities and maintenance, grounds and field maintenance, security, risk management, utilities, depreciation, and debt service. This is offset by an equal amount of revenue.

Medical expense and medical insurance premiums for student-athletes.

Includes memberships, and conference and association dues.

Include printing and duplicating, subscriptions, business insurance, telephone, postage, operating and equipment leases, nonteam travel, and any other operating expense not reported elsewhere. Indirect administration overhead provided by the university is not included.

Transportation, lodging and meals for prospective student-athletes and institutional personnel on official and unofficial visits, telephone charges, postage and other such expenditures related to recruiting. Also included is the value of the use of the university's vehicles or airplanes, and the in-kind value of loaned or contributed transportation.

Severance payments and applicable benefits recognized for past coaching and administrative personnel.

Includes support provided for spirit groups, including bands, cheerleaders, mascots, dance teams, etc.

All expenses paid by athletics, including nonathletics personnel salaries and benefits, from hosting sports camps and clinics.

Includes all compensation paid to the support staff by a third party and guaranteed by the university but included in the W-2 or 1099 forms of the institution. Examples include car stipends, club memberships, clothing allowances, speaking fees, radio and television income, and other related expenditures or in-kind products or services.

Gross salaries, bonuses and benefits paid to administrative staff (e.g., football secretary and trainers) that would be reportable on university or related entities W-2 or 1099 forms. Examples include car stipends, club memberships, clothing allowances, speaking fees, radio and television income, and other related expenditures or in-kind products or services.

Air and ground travel, lodging, meals and incidentals for competition related to pre-season, regular season, and/or postseason. Any amounts incurred for food and lodging for housing a team before a home game also should be included, as should the value of the use of the institution's owned vehicles or airplanes and in-kind value of donor-provided transportation.

| Other Terminology |  |
| :---: | :---: |
| Allocated Revenues | Revenues allocated by the institution to the athletics program. These include direct institutional support, indirect institutional support (utilities, maintenance, insurance, etc.), student fees and direct governmental support. |
| Athletics Aid Equivalencies | Full-time grants-in-aid awarded regardless of them being split among multiple athletes. Thus, four athletes each being awarded one-fourth of a grant would be considered one equivalency. |
| Capital Expenditures | Also called Balance Sheet Expenditures, these are the additional costs of physical plant assets that provide material benefits extending beyond the current period. Examples would be stadium or arena expansions or training room construction. |
| Division I without Football | This division formerly was known as Division I-AAA. This group of institutions does not sponsor football, while other requirements are identical to those of the FBS and FCS. |
| Division II | For Division II institutions, at least 50 percent of all football games must be played against FBS, FCS or Division II teams. At least 50 percent of all basketball games (both men's and women's programs) must be played against Division I or II members. At least four men's and four women's sports must be sponsored. There are no attendance, scheduling or financial-aid requirements. |
| Division III | For these institutions, more than 50 percent of all football games must be played against Division III teams or nonmembers who grant financial aid on need only. More than 50 percent of all men's basketball games must be against Division III teams or nonmembers who grant financial aid on need only. At least four men's and four women's sports must be sponsored. There are no attendance or scheduling requirements, and financial aid based on athletics ability is not permitted. |
| Football Bowl Subdivision | This division formerly was known as Division I-A. In accordance with NCAA bylaws, the group includes those institutions that play at least 60 percent of their regular season football games against other FBS institutions. All but four basketball games (both men's and women's programs) must be against other FBS teams. Seven men's and seven women's, or alternatively, six men's and eight women's sports, must be sponsored. There also are requirements for attendance, scheduling and financial aid. |
| Football Championship Subdivision | This division formerly was known as Division I-AA. These institutions must play more than 50 percent of their regular season football games against FBS or FCS institutions. All but four basketball games (both men's and women's programs) must be against other Division I teams. Seven men's and seven women's, or alternatively, six men's and eight women's sports, must be sponsored. There are also requirements for scheduling and financial aid. |
| Generated Revenues | Those revenues generated independently by the athletics program, such as ticket sales, concessions, alumni/booster contributions, and NCAA and conference distributions. |
| HEPI (Higher Education Price Index) | Higher Education Price Index is an inflation index specifically to track the main cost drivers in higher education. |

Third-Party Payments

The inflationary effect utilized in some tables is based on the HEPI provided by the U.S. Department of Labor and Statistics. The use of this index is intended to reflect the portion of annual increases in revenues and expenses that result from inflation.

Median values represent the midpoint of all values reported by respondents. These median values subsequent to the 2003 fiscal period cannot be compared with the mean values reported in prior years. It also should be noted that median values are not additive. Furthermore, if at least one-half of respondents report zero values for a line item, the median value for that line will be zero.

Total generated revenues less total operating expenses. These results are reported as either Net Generated Revenue (generated revenues exceed expenses) or Negative Net Generated Revenue (expenses exceed generated revenues).

These are payments to athletics coaches and other personnel from outside parties. Only third-party payments guaranteed by the institution are included here. Such payments are included as both revenue and expense lines

Supporting student-athlete success on the field, in the classroom and for life

[^0]:    Note: Revenues are reported excluding all allocated revenues. Expenses are reported excluding third-party support. Medians shown represent only those institutions reporting some amount for revenues or expenses.
    \# of Institutions Sponsoring represents the N that reported financial data for each of the sports listed. These N's do not reflect the overall sponsorship numbers.

[^1]:    Notes: Generated Revenues represent those earned by the athletics department and do not include allocated revenues. Allocated revenues come

[^2]:    Notes: Generated Revenues represent those earned by the athletics department and do not include allocated revenues. Allocated revenues come

[^3]:    Notes: Generated Revenues represent those earned by the athletics department and do not include allocated revenues. Allocated revenues come from
